**WEAR** a face covering or mask when in public, around high-risk people, when caring for others, or when around those not in your household.

**WATCH** your distance. Keep a safe space of at least 6 feet between yourself and other people who are not from your household in both indoor and outdoor spaces.

**WASH** your hands often and regularly for at least 20 seconds.

[5]

# Preventive Measures

In order to prevent the spread of illness in our community, the CDC recommends:

**Stay home when you are sick with respiratory disease symptoms. At the present time, these symptoms are more likely due to influenza or other respiratory viruses than to the COVID-19-related virus.**

**Follow respiratory etiquette: Cover coughs and sneezes with a tissue, then dispose of it in the trash can immediately. If you don't have a tissue, cough or sneeze into your sleeve.**

**Hand hygiene: Wash hands often with soap and water for at least 20 seconds; especially after going to the bathroom, before eating, and after blowing your nose, coughing, or sneezing. If soap and water are not readily**

**available, use an alcohol-based hand sanitizer with 60%-95% alcohol.**
