## **WORKFORCE ADVISORY COMMITTEES**

### ***Purpose, Composition, Appointment Process***

#### **Public Law 14-77, Fourteenth Guam Legislature (Bill 499), Section 11964 Advisory Committee**

The Board shall establish Advisory Committees for each of the different career programs or levels of instruction and appoint committee members from among people in the community who can best advise the Board in their area of expertise or on matters pertaining to the Board's responsibilities as established by law.

---

The Advisory Committee serves to strengthen the Career and Technical (CTE) programs. They are advisory and have no legislative, administrative, or programmatic authority. The committees work cooperatively with college officials in planning and carrying out their work.

An Advisory Committee is established to perform the following:

**Advise** - The Advisory Committee assesses specific areas of the CTE program. Recommendations made by the committee are designed to improve particular content areas;

**Assist** - The Advisory Committee may help instructors and/or administrators carry out specific activities;

**Support** - The Advisory Committee provides support for the CTE program it serves;

**Advocate** - The Advisory Committee promotes the CTE programs throughout the community.

---

#### **Purpose:**

The primary purpose of the Advisory Committee is to help the College ensure that the program is relevant to the community, address current industry standards and workforce needs, and has appropriate resources to support high quality student outcomes.

#### **Composition:**

Individuals who comprise the committee are volunteers who have expert knowledge and experience in the career tasks and competency requirements in the occupational field the program serves. To be effective, members should have a clear sense of trends in the field. They moreover, should be able to identify skills that will ensure employability of the program's graduates, and be able to identify jobs that don't exist but are likely to in the near future. Having this ability ensures that the program is kept on the cutting edge. Thus, the role of the committee is to offer recommendations for improvements that will ensure growth and expansion of the program. Balanced representation in an Advisory Committee is important to its success.

The membership should reflect a cross section of business and industry served by the program such as parents, students, academic and career and technical education teachers, faculty, administrators, career guidance and academic counselors, representatives of the entities participating in CTE activities, labor organizations, representatives of special populations, and other interested individuals involved in the development, implementation, and evaluation of career and technical education programs.

**Size of Committee:**

The number of members will vary with the nature and size of the program. On one hand, a committee that is too small may result in limited perspective, inadequate information on career fields, and too little diversity. On the other, one that is too large may prove to be unmanageable. It is recommended that there be a minimum of six members and no more than 15 active representatives from business and industry.

**Submission of Meeting Minutes:**

After each Advisory Committee meeting, please submit meeting agenda and minutes to AIER and to the Associate Dean.

Recommendation for Meetings - one meeting in October and the other in March; however Committees should meet more frequently as members deem necessary to address program needs. It is encouraged to invite Associate Dean to Advisory Meetings.

**Appointment Process:**

1. The Department nominates/recommends individuals and submits their names to the appropriate Dean.
2. The Dean submits the names of individuals recommended by the Department to the President via the Academic Vice President.
3. The President recommends the members to the Board of Trustees.
4. The Board of Trustees formally appoint Advisory Committee members.

**Term of Appointment:**

Members are appointed to serve in an Advisory Committee for a two-year term.
